## **Investor Mining and Tailings Safety Initiative**

This document must be read in conjunction with the Suncor's Interpretation Document

Overview Question 1

A) Provide an overview of your tailings facility Management system related to the specifics of each tailings facility. (Refer to The Interpretation Document for additional detail on this question)

Suncor has a two tiered approach to tailings facility management system related to the specifics of each tailings facility. (Refer to The Interpretation Document for additional detail on this question)

Overview Question 1

B) Confirm whether your approach to tailings management has changed or will change in light of the recent tailings disasters at Brumadinho, Mariana, Mt Polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings disasters at Brumadinho, Mariana, Mt Polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings disasters at Brumadinho, Mariana, Mt Polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings disasters at Brumadinho, Mariana, Mt Polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings disasters at Brumadinho, Mariana, Mt Polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings disasters at Brumadinho, Mariana, Mt Polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings at the polley and others. Have you, for example, reviewed all tailings storage facilities with upstream dam construction methods used at our sit of the recent tailings at the polley and others. Have you, for example, reviewed all tailings at the polley and others.
