

The Suncor Burrard Products Terminal is situated on 430 acres of land of which 175 acres are used for terminal operations.

- The Upper Terminal, located in Port Moody, contains the fuel processing units, main tank farm and the fuel blending facilities.
- The Middle Terminal is located on the south side of the Barnet Highway in Burnaby. It contains the secondary tank farm and truck facilities.
- The Lower Terminal is located in Burnaby, Port Moody and along the Burrard Inlet. It contains the marine and rail facilities.

Gasoline, diesel, jet fuel, ethanol, and bio-diesel arrive at the terminal via pipeline, marine tankers, trucks and rail.

Sandblasting work

The Burrard Products Terminal is conducting planned maintenance at its Upper Terminal, which includes sandblasting work.

Sandblasting is scheduled to occur between June 27 and approximately July 19, and to be confined to approved working hours as defined by municipal bylaws.

Environmental impact will be mitigated with a complete dust containment and filtration system. Reduced noise considerations are also to be employed, such as lower noise work on Sundays and Canada Day. Sandblasting work sounds similar to an industrial sweeper.

At Suncor, we value the relationship we have with our neighbors and will work to minimize the impact of this activity.

We apologize for any inconvenience this may cause and thank you for your patience.
