

## Public Notice

---

Subject: Equipment Maintenance - Spring 2021

Please note that we are proceeding with planned annual maintenance March 26, 2021 for approximately eight weeks. These activities are part of our plant's regular annual maintenance and repair program, designed to ensure safe and reliable operations.

During this period, the flare may be used more frequently than usual. Nearby residents may notice noise associated with its use. The flare is an industrial process that safely burns excess hydrocarbons in a controlled manner.

At Suncor, we value the relationships we have with our neighbours and the community and will strive to minimize the impact of this work.

We apologize for any inconvenience this situation may cause.

Thank you for your understanding.

For further information, you may contact the refinery at any time at 514-640-8000.
