

Suncor's new procurement ecosystem

Suncor is transforming the way we manage our supply chain and the way we do business with our suppliers using new cloud-based, digital applications. In 2022, we are moving to a new integrated procurement ecosystem within SAP's S4, Ariba and Fieldglass systems.

Ariba Supplier Lifecycle and Performance (SLP)

Suncor's relationship with suppliers begins with an invitation to complete the pre-qualification process in SLP.

Approved, pre-qualified suppliers, will be invited to complete the registration, qualification, and onboarding process.

Qualification

1

Ariba Sourcing Management

Upon completing the registration process, suppliers will be invited to participate in sourcing events through Suncor's Sourcing system.

Within Ariba Sourcing, suppliers will have one view into their sourcing events.

Sourcing

2

Ariba Contract Management

Successful sourcing suppliers will complete the contracting process through Suncor's Contract system.

Going forward, the ongoing management of existing contracts will occur within Ariba Contracting.

Contracting

3

Ariba Network

The ongoing transaction management for materials procurement and invoicing will be executed within Ariba.

This includes the exchange of purchase orders, confirmations, advance shipment notifications, and invoice documents.

Materials

4

SAP Fieldglass

The ongoing management for services procurement and invoicing will be executed within Fieldglass.

This includes service commitments, worker profile details, work assignments, invoices and/ timesheet documents.

Services

4

Our goals

Standardize: Use integrated and consistent processes.

Transparent: Provide partners self-serve access to data.

Accurate: Detailed data from requisition to payment.

Efficient: Find efficiencies by automating and digitizing our ecosystem.
